INDEX OF AUTHORS VOLUME 19

A

Adams, D. J. *see* Johns, Lategan, Lodge, Ryan, van Breeman and Adams 733
Adany, R. R. *see* Glukhova, Ornatsky, Frid, Kabakov, Adany, Muszbek and Smirnov 657
Anderson, E., Little, B. and Lee, G. S. Androgen-induced changes in rat ovarian granulosa cells *in vitro* 217
Ash, I. *see* Bachrach, Ash and Rahamin 39
Ashton, F. T., Beinbrech, G. and Pepe, F. A. Subfilament organization in myosin filaments of the fast abdominal muscles of the lobster, *Homarus americanus* 51

B

Bachrach, U., Ash, I. and Rahamin, E. Effect of microinjected amine and diamine oxidases on the ultrastructure of eukaryotic cultured cells 39
Bairati, A., Biasi, S. De, Cheli, F. and Oggioni, A. The head cartilage of cephalopods. 1. Architecture and ultrastructure of the extracellular matrix 673
Baldwin, K.M. and Hakim, R.S. Change of form of septate and gap junctions during development of the insect midgut 549
Baldwin, K. M., Loeb, M. J. and Riemann, J. G. A novel occluding junction which lacks membrane fusion in insect testis 413
Ballesteros, F. *see* Sánchez-Aguayo, Ballesteros, Hidalgo and López-Campos 265
Barni, S., Bernocchi, G. and Gerzeli, G. Nuclear changes and morphology of the epidermis in the hibernating frog 817
Basford, R. E. *see* Rinaldo and Basford 599
Batel, R. *see* Reuter, Dorn, Batel, Schröder and Müller 773
Beinbrech, G. *see* Ashton, Beinbrech and Pepe 51
Bernocchi, G., *see* Barni, Bernocchi and Gerzeli 817
Biasi, S. De, *see* Bairati, Biasi, Cheli and Oggioni 673
Björntorp, P. *see* Cinti, Cigolini, Sbarbati, Zancanaro and Björntorp 809
Bothwell, T. *see* Wilson, Bothwell and Rabinovitch 177
Bouligand, Y. *see* Gaill and Bouligand 625
Bradbury, P., Deroux, G. and Campillo, A. The feeding apparatus of a chitinivorous ciliate 351
Brannon, M.A. *see* Dodson, Martin, Brannon, Mathison and McFarland 159
Bromhall, C. Spider tracheal systems 793
Burighel, P. *see* Lane, Dallai, Martinucci and Burighel 399
Burighel, P. see Martinucci, Dallai and Burighel 251

C

Campillo, A. *see* Bradbury, Deroux and Campillo 351
Capco, D. G., Munoz, D. M. and Gassmann, C. J. A method of analysis of the detergent-resistant cytoskeleton of cells within organs 607
Chain, B. M. *see* Howes, Chain, Smith and Treherne 877
Cheli, F. *see* Bairati, Biasi Cheli and Oggioni 673
Cigolini, M. *see* Cinti, Cigolini, Sbarbati, Zancanaro and Björntorp 809
Cinti, S., Cigolini, M., Sbarbati, A., Zancanaro, C. and Björntorp, P. Effects of noradrenaline exposure on rat brown adipocytes in culture. An ultrastructural study 809
Compère, Ph. and Goffinet, G. Ultrastructural shape and three-dimensional organization of the intracuticular canal systems in the mineralized cuticle of the green crab *Carcinus maenas* 839
Compère, Ph. and Goffinet, G. Elaboration and ultrastructural changes in the pore canal system of the mineralized cuticle of *Carcinus maenas* during the moulting cycle 859
Conrad, P. A., *see* Fawcett, Conrad, Grootenhuis and Morzaria 643
Coomans, A., *see* Van de Velde and Coomans 713
Coughlin, J. E. *see* Herman, Newcomb, Coughlin and Jacobson 197
Cox, R. *see* Moller, Partridge, Cox, Pellegrini and Ritchie 783
Cummings, M. O. *see* Dales and Cummings 387

D

Dales, R. P. and Cummings, M. O. Role of the nephridia in the elimination of foreign cells from the coelomic fluid of two polychaete annelids, with observations on the structure of the nephridia 387
Dallai, R. *see* Lane, Dallai, Martinucci and Burighel 399
Dallai, R. *see* Martinucci, Dallai and Burighel 251
Denefle, J.-P., Lechaire, J. P. and Zhu, Q.-L. Cultured epidermis influences the fibril organization of purified type I collagen gels 469
Deroux, G. *see* Bradbury, Deroux and Campillo 351
Ditrich, H. Scanning electron microscope investigation of mouse cerebellar macrophages *in vitro* 727
Dodson, M. V., Martin, E. L., Brannon, M. A., Mathison, B. A. and McFarland, D. C. Optimization of bovine satellite cell-derived myotube formation *in vitro* 159
Dorn, A., *see* Reuter, Dorn, Batel, Schröder and Müller 773

Dougherty, W. J. Oriented Spermatozoa in the spermatophore of the palaemonid shrimp, *Macrobrachium rosenbergii* 145
Dürrschmidt, M. and Patterspn, D. J. A light and electron microscopic study of a new species of centroheliozoon, *Chlamydaster fimbriatus* 365
Dudani, A. K. and Gupta, R. S. Effect of chlorpromazine and trifluoperazine on cytoskeletal components and mitochondria in cultured mammalian cells 183
Dupont, Y. *see* Villaz, Ronjat. Garrigos and Dupont 135

E

Eichhammer, P., Zeller, R. and Rohkamm, R. Fixation of neural tissue for electron microscopy with an electronically controlled perfusion pump 153
Ellis, L. C. *see* Youson, Ellis, Ogilvie and Shivers 531

F

Familiari, G., Nottola, S. A. and Motta, P. M. Focal cell contacts detected by ruthenium red, triton X100 and saponin in the granulosa cells of mouse ovary 207
Fawcett, D. W., Conrad, P. A., Grootenhuis, J. G. and Morzaria, S. P. Ultrastructure of the intraerythrocytic stage of *Theileria* species from cattle and waterbuck 643
Flechon, B. *see* Hunter, Flechon and Flechon 423
Flechon, J.-E. *see* Hunter, Flechon and Flechon 423
Frid, M. G. *see* Glukhova, Ornatsky, Frid, Kabakov, Adany, Muszbek and Smirnov 657
Fristrom, D. *see* Wolfgang, Fristrom and Fristrom 827
Fristrom, J. W. *see* Wolfgang, Fristrom and Fristrom 827

G

Gaill, F. and Bouligand, Y. Supercoil of collagen fibrils in the integument of *Alvinella*, an abyssal annelid 625
Garrigos, M. *see* Villaz, Ronjat, Garrigos and Dupont 135
Gassmann, C. J. *see* Capco, Munoz and Gassmann 607
Gerzeli, G. *see* Barni, Bernocchi and Gerzeli 817
Glukhova, M. A., Ornatsky, O. I., Frid, M. G., Kabakov, A. E., Adany, R. R., Muszbek, L. and Smirnov, V. N. Identification of smooth muscle-derived foam cells in the atherosclerotic plaque of human aorta with monoclonal antibody IIG10 657
Goffinet, G. *see* Compère and Goffinet 839
Goffinet, G. *see* Compère and Goffinet 859
Gontrand, G. *see* Hawkes, Rzepka and Gontrand 687
Granger, H. J. *see* Schelling, Hawker and Granger 463
Gremigni, V. *see* Nigro and Gremigni 377
Grigorian, G. Yu. *see* Tertov, Orekhov, Grigorian, Kurennaya, Kudryashov, Tkachuk and Smirnov 21
Grootenhuis, J. G. *see* Fawcett, Conrad, Grootenhuis and Morzaria 643
Gudeman, D. M., Nelson, S. R. and Merisko, E. M. Protein secretion by choroid plexus: isolated apical fragments synthesize protein *in vitro* 101
Gupta, R. S. *see* Dudani and Gupta 183

H

Hackman, R. H. *see* Hines and Hackman 71
Hakim, R. S. *see* Baldwin and Hakim 549
Hawker, J. R., Jr. *see* Schelling, Hawker and Granger 463
Hawkes, F., Rzepka, J. amd Gontrand, G. The scent glands of the male South American locust *Schistocerca cancellata*, an electron microscope study 687
Herman, C. *see* Mia, Oakford, Torres, Herman and Yorio 437
Herman, I. M. Extracellular matrix-cytoskeletal interactions in vascular cells 1
Herman, I. M., Newcomb, P. M., Coughlin, J. E. and Jacobson, S. Characterization of microvascular cell cultures from normotensive and hypertensive rat brains: pericyte-endothelial cell interactions *in vitro* 197
Hessinger, D. A. *see* Watson and Hessinger 747
Hidalgo, J. *see* Sánchez-Aguayo, Ballesteros, Hidalgo and López-Campos 265
Hines, E. R. and Hackman, R. H. Ultrastructure and development of the extensible abdominal intersegmental membranes of the female migratory locust 71
Holy, J. M. and Oaks, J. A. Mechanical integration of muscle, tegument, and sub-tegumental tissues by anchoring fibrils and microfibrils in the cestode *Hymenolepis diminuta* 881
Howes, E. A., Chain, B. M., Smith, P. J. S. and Treherne, J. E. Blood cells contribute to glial repair in an insect 877
Hughes, P. M. Insect cuticle growth layers seen under the scanning electron microscope: a new display method 705
Hunter, R. H. F., Flechon, B. and Flechon, J.-E. Pre- and peri-ovulatory distribution of viable spermatozoa in the pig oviduct: a scanning electron microscope study 423

J

Jacobson, S. *see* Herman, Newcomb, Coughlin and Jacobson 197
Jarial, M. S. Ultrastructure of the anal organ of *Drosophila* larva with reference to ion transport 559
Johns, A., Lategan, T. W., Lodge, N. J., Ryan, U. S., van Breemen, C. and Adams, D. J. Calcium entry through receptor-operated channels in bovine pulmonary artery endothelial cells 733
Johnson, S. A. and Milner, M. J. The final stages of wing development in *Drosophila melanogaster* 505

K

Kabakov, A. E. *see* Glukhova, Ornatsky, Frid, Kabakov, Adany, Muszbek and Smirnov 657

INDEX OF SUBJECTS VOLUME 19

A

AChE, in mouse skeletal muscles 243
ADH, in frog 437
Acrosome, of pig spermatozoa 423
Actin 183, 197
Actinomycin D 167
Adipocytes, brown, effects of noradrenaline exposure on 809
Adrenal, rat, in primary culture, effect of RNA synthesis inhibitors on 167
Alvinella, abyssal annelid, supercoil of collagen fibrils in integument of 625
α-amanitin 167
Amphioxus, cell junctions in: a thin section and freeze-fracture study of 399
Androgen, -induced changes in rat ovarian granulosa cells *in vitro* 217
Angiogenesis 463
Angiogenic factors, immunochemical comparison of peptide 463
Annelid, abyssal, *Alvinella*, supercoil of collagen fibrils in the integument of 625
—s, polychaete, role of the nephridia in the elimination of foreign cells from the coelomic fluid in, with observations on the structure of the nephridia 387
Antibody, monoclonal, the fibrous system of the extracellular matrix of *Podocoryne carnea* and its degradation by the subumbrellar plate endoderm demonstrated by 757
Antigen, assembly zone, of the insect cuticle 827
Aorta, human, atherosclerotic plaque of, smooth muscle-derived foam cells in 657
—, —, cyclic AMP and cyclic GMP content and activity of related enzymes in 21
Apocrine secretion, in choroid plexus 101
Arthrodial membrane, of locust 71
Ascidians, a comparative study of ciliary differentiations in the branchial stigmata of 251
Atherosclerosis, disorders in the system of cyclic nucleotides in: cyclic AMP and cyclic GMP content and activity of related enzymes in human aorta 21
Axopods, of centroheliozoon 365

B

Bacteria, symbiotic, in insect fat body 83
Basal lamina, of cestode tissues 881
— —, the ability of an epithelium to survive removal of, by enzymes: fine structure and content of sodium and potassium of the midgut epithelium of the larva of *Tenebrio molitor* after withdrawal of the 65
Biliary atresia, in the lamprey, gap junctions and zonulae occludentes of hepatocytes during 531
Bladder, urinary, of frog: morphometric analysis of epithelial cells of 437
Blood cells, contribute to glial repair in an insect 877
— -testis barrier, in insect 413
Bone marrow, congenitally osteosclerotic (*OC/OC*) mice are resistant to cure by transplantation of 29
Brown adipocyte, rat, effects of noradrenaline exposure on 809

C

Calcium, entry through receptor-operated channels in bovine pulmonary artery endothelial cells 733
—, -ionophore (A23187) 437
—, uptake, and release, in lobster remotor antenna muscle 135
Canal systems, intracuticular, in *Carcinus maenas* 859
Cell detachment, effects of colchicine on sulfated glycosaminoglycan production on 617
Centroheliozoon, a new species of, a light and electron microscopic study of 365
Cephalopods, head cartilage of: architecture and ultrastructure of the extracellular matrix of 673
Cercal sensilla, of blowfly *Lucilia cuprina*. 1. Structure of the sockets and distal dendritic regions 287
Cerebellar macrophages, mouse, SEM investigation of 727
Channels, receptor-operated, calcium entry through, in bovine artery endothelial cells 733
Chemoreceptor, receptor-mediated endocytosis of, in triggering the discharge of cnidae in a sea anemone tentacle 747
—s, olfactory, of blowfly 287
Chitinivorous ciliate, feeding apparatus of 351
Chloroplast, symbiosis, in centroheliozoon 365
Chlorpromazine 183
Chondrocyte, of head cartilage of cephalopods 673
Choroid plexus, protein secretion by: isolated apical fragments synthesize protein *in vitro* 101
Cilia, in branchial stigmata of ascidians 251
—, of amphioxus, a thin-section and freeze-fracture study of 399
Ciliate, chitinivorous, the feeding apparatus of 351
Ciliogenesis, in tracheal epithelium 783
Circulatory system, disorders in the system of cyclic nucleotides in atherosclerosis: cyclic AMP and cyclic GMP content and activity of related enzymes in human aorta 21
Coelenterate, receptor-mediated endocytosis of a che-

moreceptor involved in triggering the discharge of cnidae in a sea anemone tentacle 747
—, the fibrous system of the extracellular matrix of *Podocoryne carnea* and its degradation by the subumbrellar plate endoderm demonstrated by a monoclonal antibody 757
Coelomic fluid, role of the nephridia in the elimination of foreign cells from, in polychaete annelids 387
Colchicine, effects of, on sulfated glycosaminoglycan production and cell detachment in precapillary pulmonary endothelial cells 617
Collagen, of insect connective tissue 587
—, supercoil of fibrils of, in the integument of *Alvinella*, an abyssal annelid 625
— gels, purified type I, cultured epidermis influences the fibril organization of 469
— substrate, in study of tracheal epitherlial cells 783
Congenitally osteosclerotic (*OC/OC*) mice are resistant to cure by transplantation of bone marrow of spleen cells from normal littermates 29
Connective tissue, of an insect central nervous system, enzyme effects on 587
Cordycepin 167
Crustacea, oriented spermatozoa in the spermatophore of the palaemonid shrimp, *Macrobrachium rosenbergii* 145
Crustacean, green crab *Carcinus maenas*, cuticle of 839
—, — — — —, — — 859
—, lobster, the remotor muscle of the lobster antenna: sarcoplasmic reticulum and skinned fiber experiments 135
—, morphometry of transport tissues in a freshwater 319
Cuticle, an assembly zone antigen of the insect 827
—, insect, growth layers, seen under the scanning electron microscope: a new display method 705
—, mineralized, of *Carcinus maenas*, ultrastructural shape and three-dimensional organization of intracuticular canal systems in 839
—, —, — — —, elaboration and ultrastructural changes in the pore canal system of 859
—, of abdominal intersegmental membranes of the female migratory locust 71
—, of *Drosophila* larva anal organ 559
Cyclic AMP 21
— GMP 21
Cytoskeletal-matrix, interactions in vascular cells 1
Cytoskeleton, detergent-resistant, a method of analysis of 607
—, effects of chlorpromazine and trifluoperazine on 183
—, of filopodia of insect cells 301

D

Dendrite, distal, in cercal sensilla 287
Detergent, -resistant cytoskeleton, a method of analysis of 607
Differentiation, in tracheal epithelium 783
Digestive system, quantitative evidence for merocrine secretion in insect midgut cells 451

E

Egg-shell, in a free-living marine platyhelminth, *Vorticeros luteum* 377
Elastase, withdrawal of the basal lamina by 65
Endocytosis 515
—, receptor-mediated, of a chemoreceptor involved in triggering the discharge of cnidae in a sea anemone tentacle 747
Endoderm, of subumbrellar plate, the fibrous system of the extracellular matrix of *Podocoryne carnae* and its degradation by 757
Endothelial, -neutrophil interactions: modulation of neutrophil activation responses by endothelial cells 599
— cell, -pericyte interaction, *in vitro* 197
— —s, bovine pulmonary artery, calcium entry into, through receptor-operated channels 733
— —, neutrophil-endothelial interactions: modulation of neutrophil activation responses by 599
— —, precapillary pulmonary effects of colchicine on sulfated glycosaminoglycan production and cell detachment in 617
— factor, pulmonary artery, causes unidirectional alignment of smooth muscle cells 177
— mitogens 463
Epidermis, cultured, influences the fibril organization of purified type I collagen gels 469
—, in the hibernating frog, nuclear changes and morphology in 817
Eukaryotic cultured cells, effect of microinjected amine and diamine oxidases on the ultrastructure of 39
Excretory system, histochemical studies of uric acid in some insects. 3. Excretion of uric acid by the Malpighian tubules in *Calliphora vicina* and *Rhodnius prolixus* 275
— —, morphometric analysis of epithelial cells of frog urinary bladder. 1. Effect of antidiuretic hormone, calcium ionophore (A23187) and PGE_2 437
— —, of *Helix aspersa*, epithelial cell types of ureter of 265
— —, role of the nephridia in the elimination of foreign cells from the coelomic fluid of two polychaete annelids, with observations on the structure of the nephridia 387
— —, ultrastructure, of the marine nematode *Monhystera* 713
Exocytosis 495
Extracellular matrix, -cytoskeletal interactions in vascular cells 1
— —, fibrous system of, in *Podocoryne carnea* and its degradation by the subumbrellar plate endoderm demonstration by a monoclonal antibody 757
— —, of connective tissue of insect central nervous system 587
— —, of head cartilage of cephalopods 673

F

Fat body, insect, uric acid and polyphenols in 93
Fibrils, anchoring, and microfibrils, in the cestode *Hymenolepis* 881
Fibroblast, cytoskeleton of 607
Filopodia, the very rapid induction of, in insect cells 301
Fixation, of neural tissue for electron microscopy with an electronically controlled perfusion pump 153
Foam cells, identification of smooth muscle-derived, in the atherosclerotic plaque of human aorta, with monoclonal antibody IIG10 657
Freeze-fracture, of branchial stigmata of ascidians 251
—, of cell junctions in amphioxus (Cephalochordata) 399
—, of insect midgut 549
—, of lamprey hepatocytes during biliary atresia 531
—, of muscle fibres infected with *Trichinella spiralis* 665
Frog, hibernating, nuclear changes and morphology of the epidermis in 817

G

Gap junctions, of hepatocytes 531
— —, of insect midgut 549
Gills, transport tissues in, in a crustacean 319
Glial repair, in an insect, blood cells contribute to 877
Glycosaminoglycan, sulfated effect of colchicine on production of 617
Granulosa cells, of mouse ovary, focal cell contacts detected by ruthenium red, triton X100 and saponin in the 207
— —, rat ovarian, androgen-induced changes in 217
Growth factors, heparin-binding 463

H

Haemocytes, contribute to glial repair in an insect 877
Helicoids, in insect cuticle growth layers 705
Hemocyanin, cephalopod 673
Hepatocytes, of lamprey 531
Hibernation, frog, nuclear changes and morphology of the epidermis during 817
Hormone, antidiuretic, in frog 437
—s, of anterior pituitary of mouse 235
Hymenolepis diminuta, cestode, mechanical integration of muscle, tegument, and sub-tegumental tissues by anchoring fibrils and microfibrils in the 881

I

Immunochemistry, of peptide angiogenic factors 463
—, of an assembly zone antigen in insect cuticle 827
—, of lysosomal integral membrane proteins 495
—, of mosquito yolk protein 525
—, pericyte-endothelial interactions 197
Insect, a novel occluding junction which lacks membrane fusion in testis of 413
—, *Antheraea polyphemus*, diffusion barriers in silkmoth sensory epithelia: application of lanthanum tracer to olfactory sensilla of 119
—, blood cells contribute to glial repair in 877
—, *Bombyx mori*, diffusion barriers in silkmoth sensory epithelia: application of lanthanum tracer to olfactory sensilla of 119
—, change of form to septate and gap junctions during development of the insect midgut 549
—, cuticle, an assembly zone antigen of 827
—, — growth layers seen under the scanning electron microscope: a new display method 705
—, dipteran, extraocular photoreceptors in 111
—, *Drosophila* larva, ultrastructure of the anal organ of, with reference to ion transport 559
—, *Drosophila melanogaster*, the final stages of wing development in 505
—, enzyme effects on the connective tissues of an insect central nervous system 587
—, histochemical studies of uric acid in some insects. 1. Storage in the fat body of *Periplaneta americana* and the action of the symbiotic bacteria 83
—, —. 2. Uric acid and polyphenols in the fat body 93
—, *Lucilia cuprina*, the cercal sensilla of: structure of the sockets and distal dendritic regions of 287
—, midgut cells, quantitative evidence for merocrine secretion in 451
—, monoclonal antibodies as probes for processing of the mosquito yolk protein; a high-resolution immunolocalization of secretory and accumulative pathways 515
—, *Schistocerca cancellata*, the scent glands of the male south American locust: an electron microscope study 687
—, the ability of an epithelium to survive removal of the basal lamina by enzymes: fine structure and content of sodium and potassium of the midgut epithelium of the larva of *Tenebrio molitor* after withdrawal of the basal lamina by elastase 65
—, ultrastructure and development of the extensible abdominal intersegmental membranes of the female migratory locust 71
— cells, the very rapid induction of filopodia in 301
—s, *Calliphora vicina* and *Rhodnius prolixus*, excretion of uric acid by the Malpighian tubules in 275
Ion transport, in anal organ of *Drosophila* larva 559
Integumental glands, scent, of locust: an electron microscope study 687
Intersegmental membranes, abdominal, of the female migratory locust, ultrastructure and development of the 71
Intracisternal granules, in somatotrophs in the anterior pituitary of the mouse 235
Intraerythrocytic stage, of *Theileria* species from cattle and waterbuck, ultrastructure of 643
Ion channels, in endothelial cells 733
Ionophore, calcium, (A23187) 437

J

Junction, intercellular, a novel occluding junction which lacks membrane fusion in insect testis 413
—, septate, in insect testis 413
—s, intercellular, in amphioxus: a thin-section and freeze-fracture study of 399
—, —, in insect midgut 549
—, —, in mouse ovary 207
—, —, of hepatocytes, during biliary atresia in the lamprey 531
—, —, of sertoli cells 479
—, myomyous, in mouse skeletal muscles 243

K

Keratinocyte, frog 469

L

Lamprey, gap junctions and zonulae occludentes of hepatocytes during biliary atresia in the 531
Lanthanum tracer, in olfactory sensilla 119
Leukemia cells, rat basophilic, the distribution of four lysosomal integral membrane proteins in 495
Liquid crystal, in insect cuticle growth layers 705
— —, in integument of an abyssal annelid 625
Lysosomal proteins, integral membrane, in rat leukemia cells 495

M

Macrophages, mouse cerebellar, SEM investigation of, *in vitro* 727
Malpighian tubules, excretion of uric acid by 275
Mechanoreceptors, of blowfly 287
Mesogloea, of coelenterate *Podocoryne* 757
Mesohyl, sponge, evidence for the existence of microtubule protein in 773
Metamorphosis, of *Drosophila* 505
Microcirculation 197
Microfibrils, and fibrils, mechanical integration of muscle, tegument, and sub-tegumental tissues by, in the cestode *Hymenolepis* 881
Microtubule, protein, evidence for the existence of, in the extracellular space of marine sponges 773
—s, in wing development 505
Midgut, insect, change of form of septate and gap junctions during development of the 549
— epithelium, of the larva of *Tenebrio molitor*, after withdrawal of the basal lamina by elastase 65
Mitochondria, effect of chlorpromazine and trifluoperazine on, in cultured mammalian cells 183
—, of rat brown adipocyte, effects of noradrenaline on 809
Mollusc, *Helix aspersa*, epithelial cell types of the primary ureter of: ultrastructure and cytochemical characteristics 265
—s, cephalopods, head cartilage of 673
Monhystera, marine nematode, ultrastructure of the excretory system of 713
Monoclonal antibodies, as probes for processing of the mosquito yolk protein; a high-resolution immunolocalization of secretory and accumulative pathways 515
— —, to peptide angiogenic factors 463
— —, IIG10, identification of smooth muscle-derived foam cells in the atherosclerotic plaque of human aorta with 657
— —, the fibrous system of the extracellular matrix of *Podocoryne carnea* and its degradation by the subumbrellar plate endoderm demonstrated by 757
Morphometry, of cardiac myocytes 577
—, of epithelial cells of frog urinary bladder. 1. Effect of antidiuretic hormone, calcium ionophore (A23187) and PGE_2 437
—, of insect midgut cells 451
—, of transport tissues in a freshwater crustacean 319
Mucuc coat, in a new species of centroheliozoon 365
Muscle, isolation of cardiac myocytes from the adult newt, *Notophthalmus viridescens*. An electron microscopic and quantitative light microscopic analysis 577
—, mechanical integration of, with tegument and sub-tegumental tissues, by anchoring fibrils and microfibrils, in a cestode 881
—, remotor, of the lobster antenna: sarcoplasmic reticulum and skinned fiber experiments 135
—, smooth, -derived foam cells 657
—, subfilament organization in myosin filaments of the fast abdominal muscles of the lobster, *Homarus americanus* 51
— cells, smooth, a pulmonary artery endothelial factor causes unidirectional alignment of 177
— fibres, infected with *Trichinella spiralis*, freeze-fracture study of 665
—s, fast abdominal, of the lobster, *Homarus americanus*, subfilament organization in myosin filaments of 51
—, mouse skeletal, myomyous junction in 243
Myocytes, cardiac, isolation of, from the adult newt, *Notophthalmus viridescens*. An electron microscopic and quantitative light microscopic analysis 577
Myomyous junctions, in mouse skeletal muscles, fine structure of 243
Myosin filaments, of the fast abdominal muscles of the lobster, *Homarus americanus* 51
Myotube, formation *in vitro*, optimization of bovine satellite-cell derived 159

N

Nematocyst, discharge in sea anemone tentacle 747
Nematode, marine, *Monhystera*, ultrastructure of the excretory system of 713
—, *Trichinella*, muscle fibres infected by, freeze-fracture study of 665
Nephridia, structure of, in polychaete annelids 387
Nervous system, blood cells contribute to glial repair in an insect 877
— —, central, of an insect, enzyme effects on the connective tissue of 587

— —, fixation of neural tissue for electron microscopy with an electronically controlled perfusion pump 153
— —, rat brain, normotensive and hypertensive, characterization of microvascular cell cultures from 197
— —, sensory, diffusion barriers in silkmoth sensory epithelia: application of lanthanum tracer to olfactory sensilla of *Antheraea polyphenus* and *Bombyx mori* 119
— —, —, internal extraocular photoreceptors in a dipteran insect 111
— —, —, the cercal sensilla of the blowfly, *Lucilia cuprina*. I. Structure of the sockets and distal dendritic regions 287
Neural tissue, fixation of for electron microscopy with an electronically controlled perfusion pump 153
Neutrophil, -endothelial interactions: modulation of neutrophil activation responses by endothelial cells 599
Noradrenaline, effects of, on rat brown adipocytes in cultures. An ultrastructural study 809
Nucleus, changes in, during hibernation in the frog 817

O

Occluding junction, a novel, in insect testis 413
Ocellus, extraocular internal, in an insect 111
Oogenesis, ultrastructural features of, in a free-living marine platyhelminth, *Vorticeros luteum* 377
Ovary, mouse, granulosa cells of, focal cell contacts detected by ruthenium red. triton X100 and saponin in the 207
Oviduct, of pig, pre- and peri-ovulatory distribution of viable spermatozoa in: a scanning electron microscope study 423
Oxidases, effect of microinjected amine and diamine, on the ultrastructure of eukaryotic cultured cells 39

P

Pericyte-endothelial, cell interactions: characterization of microvascular cell cultures from normotensive and hypertensive rat brains 197
Phagocytosis, elimination of foreign cells from the coelomic of two polychaete annelids 387
Photoreceptors, extraocular, in a dipteran insect 111
Pituitary, anterior, of mouse, intracisternal granules in somatotrophs of 235
Platyhelminth, cestode *Hymenolepis*, mechanical integration of muscle, tegument, and sub-tegumental tissues by anchoring fibrils and microfibrils in 881
—, marine, *Vorticeros luteum*, ultrastructural features of oogenesis in a free-living 377
Podocoryne carnea, coelenterate 757
Polyphenols, and uric in fat body 93
Pore canal, system, of mineralized cuticle of *Carcinus maenas* 859
Potassium, of the midgut epithelim, after withdrawal of the basal lamina by elastase 65
Prostaglandins, in frog 437
Protein secretion, by choroid plexus 101
Proteins, lysosomal integral membrane, in rat basophilic leukemia cells, the distribution of four 495
Protozoan, chitinivorous ciliate, feeding apparatus of 351
—, *Chlamydaster fimbriatus*, centroheliozoon, a light and electron microscopic study of a new species of 365
—, *Theileria* 643

R

RNA synthesis, -inhibitors on young rat adrenal in primary culture. An ultrastructural study 167
Receptor, -mediated endocytosis of a chemoreceptor involved in triggering the discharge of cnidae in a sea anemone tentacle 747
—, -operated channels in endothelial cells 733
Reproductive system, a comparative study of sertoli cell ectoplasmic specializations in selected non-mammalian vertebrates 479
— —, a novel occluding junction which lacks membrane fusion in insect testis 413
— —, androgen-induced changes in rat ovarian granulosa cells *in vitro* 217
— —, focal cell contacts detected by ruthenium red, triton X100 and saponin in the granulosa cells of mouse ovary 207
— —, oriented spermatozoa in the spermatophore of the palaemonid shrimp, *Macrobrachium rosenbergii* 145
— —, pre- and peri-ovulatory distribution of viable spermatozoa in the pig oviduct: a scanning electron microscope study 423
— —, ultrastructural features of oogenesis in a free-living marine platyhelminth, *Vorticeros luteum* 377
Respiratory system, spider tracheal systems 793
Rhabdom, of extraocular ocellus 111

S

SEM, investigation of mouse cerebellar macrophages *in vitro* 727
—, of insect cuticle growth layers 705
Saponin 207
Sarcoplasmic reticulum, of remotor muscle of lobster antenna 135
Satellite cell, -derived myotube formation *in vitro* 159
Scent glands, of the south American locust *Schistocerca cancellata* 687
Secretion, merocrine, in insect midgut cells 451
Sensilla, campaniform, of blowfly 287
—, cercal, of blowfly *Lucilia cuprina* 287
—, olfactory, of *Antheraea* and *Bombyx* 119
Septate junctions, of insect midgut 549
Sertoli cell, ectoplasmic specializations in selected non-mammalian vertebrates, a comparative study of 479
Skinned fiber, experiments on remotor muscle of lobster antenna 135
Smooth muscle,-derived foam cells in the atherosclerotic plaque of human aorta with monoclonal antibody IIG10 657

Sodium, of the midgut epithelium, after withdrawal of the basal lamina by elastase 65
Somatotrophs, in the anterior pituitary of the mouse 235
Spermatids, non-mammalian vertebrate 479
Spermatophore, oriented spermatozoa in, of palaemonid shrimp 145
Spermatozoa, oriented, in the spermatophore of the palaemonid shrimp, *Macrobrachium rosenbergii* 145
—, viable, distribution of, in pig oviduct 423
Spermiogenesis, in non-mammalian vertebrates 479
Spider, tracheal systems 793
Spleen cells, congenitally osteosclerotic (*OC/OC*) mice are resistant to cure by transplantation of bone marrow or 21
Sponge, marine, evidence for the exostence of microtubule protein in the extracellular space of 773
Stereology, of cardiac myocytes 577
—, of insect midgut cells 451
—, oriented spermatozoa in the spermatophore of the palaemonid shrimp, *Macrobrachium rosenbergii* 145
Subfilament organization, in myosin filaments of the fast abdominal muscles of the lobster, *Homarus americanus* 51
Sulfated glycosaminoglycans, production of, effects of colchicine on 617
Supercoil, of collagen fibrils in the integument of *Alvinella*, an abyssal annelid 625
Symbiont, chitinivorous ciliate 351
Symbiotic bacteria, in insect fat body 83

T

Tegument, of cestode 881
Testis, insect, a novel occluding junction which lacks membrane fusion in 413
Theileria, ultrastructure of the intraerythrocytic stage of 643
Thrombin 733
Tissue culture, a method of analysis of the detergent-resistant cytoskeleton of cells within organs 607
— —, a pulmonary artery endothelial factor causes unidirectional alignment of smooth muscle cells 177
— —, an *in vitro* system for the study of tracheal epithelial cells 783
— —, androgen-induced changes in rat ovarian granulosa cells *in vitro* 217
— —, calcium entry through receptor-operated channels in bovine pulmonary artery endothelial cells 733
— —, characterization of microvascular cell cultures from normotensive and hypertensive rat brains: pericyte-endothelial cell interactions *in vitro* 197
— —, cultured epidermis influences the fibril organization of purified type I collagen gels 469
— —, effect of chlorpromazine and trifluoperazine on cytoskeletal components and mitochondria in cultured mammalian cells 183
— —, effect of microinjected amine and diamine oxidases on the ultrastructure of eukaryotic cultured cells 39
— —, effects of colchicine on sulfated glycosaminoglycan production and cell detachment in precapillary pulmonary endothelial cells 617
— —, effects of noradrenaline exposure on rat brown adipocytes in culture. An ultrastructural study 809
— —, identification of smooth muscle-derived foam cells in the atherosclerotic plaque of human aorta with monoclonal antibody IIG10 657
— —, isolation of cardiac myocytes from the adult newt, *Notophthalmus viridescens*. An electron microscopic and quantitative light microscopic analysis 577
—— —, neutrophil-endothelial interactions: modulation of neutrophil activation responses by endothelial cells 599
— —, optimization of bovine satellite cell-derived myotube formation *in vitro* 159
— —, RNA synthesis inhibitors on young rat adrenal in primary culture. An ultrastructural study 167
— —, scanning electron microscope investigation of mouse cerebellar macrophages *in vitro* 727
Tracheae, of spiders 793
Tracheal epithelial cells, an *in vitro* system for the study of 783
— systems, spider 793
Transport tissues, morphometry of, in a freshwater crustacean 319
Trichinella spiralis, muscle fibres infected by 665
Trifluoperazine 183
Triton X100 207
Tubulin, evidence for the existence of, in the extracellular space of marine sponges 773

U

Ureter, primary, of *Helix aspersa*, epithelial cell types of 265
Uric acid, excretion of by the Malpighian tubules in *Calliphora vicina* and *Rhodnius prolixus* 275
— —, histochemical studies of in some insects. 1. Storage in the fat body of *Periplaneta americana* and the action of the symbiotic bacteria 83
— —, —. 2. Uric acid and polyphenols in the fat body 93
Urochordates, ascidians, ciliary differentiations in 251

V

Vascular cells, extracellular matrix-cytoskeletal interactions in 1
Ventral gland, of marine nematode *Monhystera* 713

W

Wing, development, final stages of, in *Drosophila* 505

Y

Yolk protein 515

Z

Zonulae occludentes, of lamprey hepatocytes 531
